Hammock can be used on both sides -
with or without the net

The hammock in forest look with mosquito net

The ultra-light hammock Moskito-Traveller Forest comes with a practical mosquito net.

The Moskito-Traveller Forest is ultra-light, the pack dimensions are very small, and both sides can be used: with or without the net. But it is also extremely robust and can hold up to 200 kg.

It can be hung up and taken down very quickly due to the fixed mosquito net suspension installation with length adjusting facility. No additional ridgeline anchoring points are needed. You get in from the side by opening a double zipper. Generous interior thanks to the patented spreader bars (included).

For optimum camouflage in almost all seasons: the forest look combines a pattern of leaves, trees and the typical colours of the forest. Thus the hammock blends inconspicuously into the background and optical silhouettes melt into the background.

PRODUCT DATA:

00 1429 575
00 1450 506
00 1470 918

- Item number/EAN: AZ-1030218 / 4030454007696
- Total length: approx. 295 cm (including suspension loops)

- Individual pack dimensions: approx. 245 x 155 x 85 mm
- Master box: approx. 480 x 290 x 400 mm / 12,4 kg / contains 20 units

Delivery without hammock

Hammock tarp in forest look

The hammock rain roof "Traveller Tarp Forest" is measured precisely to the hammock's size. This turns the hammock into an outdoor bed!

Traveller Tarp Forest is suspended from the attachment points of the hammock and tightened (pegs and guy ropes with adjustment carabiners are included). The trapezoidal cut of the tarp allows sufficient air to circulate and still provides protection from rain, sun and falling leaves. All anchoring points are equipped with small pockets for the guy ropes.

For optimum camouflage in almost all seasons: the forest look combines a pattern of leaves, trees and the typical colours of the forest. Thus the tarp blends inconspicuously into the background and optical silhouettes melt into the background.

Robust and versatile - even without a hammock, of course.

Suitable for many AMAZONAS hammocks. PUR-coated Nylon Ripstop, extremely watertight.

Adjustable
snap hook

Incl. 4 tent pegs

Small pockets for
storing the ropes

The thermal coverlet for hammocks

Topquilt is the ideal solution for comfortable nights in your hammock. When you are curled up in your Ultra-Light hammock, the hollow fibre filling gives you perfect thermal insulation from above.

The conical form of Topquilt is specially designed for spending the night in your hammock – without any irritating zips. That way you can get in and out of the hammock without a problem, and you have complete freedom of movement for maximum comfort when you are asleep. The top is individually adjustable. The closed lower end gives you particularly effective thermal insulation from the knee down.

For cold nights, you can be even more snug if you add an Underquilt (not included).

And if you don't fancy sleeping in the hammock, you can just use your Topquilt as an ordinary blanket.
